iDR™

TeraWatt Mastering energy

TERAWATT INTELLIGENT DEMAND RESPONSE

iDR™ is a fully customized energy conservation solution that fits any electrical system requirement, optimizing its consumption, saving money and resources without compromising equipment integrity and design intent

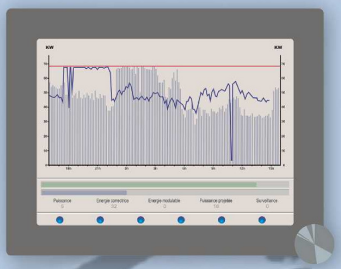

- ✓ Produces significant energy cost savings
- ✓ Quick Return on Investment (ROI)
- ✓ Real-Time energy monitoring & reporting of measured and verified results
- ✓ Real-Time carbon emission monitoring, tracking and reporting
- ✓ Interface option with electrical Distributed Generation platforms
- ✓ Modular technology, complete system customization

PROVEN ELECTRICITY SAVINGS

- Up to 20% electrical savings
- Comprehensive planning, detailed schematics and projected cost-savings
- Strategic analysis of power demand and energy usage reducing costs
- Detailed hourly reporting on performance and power optimization results
- Auto regulated for pre-customized protocols: humidity/temperature levels
- Remote and/or local access on coded interface -14" color touch screen
- Saturation control and auto by-pass to optimize Emergency power

WIDE RANGE OF TURN-KEY INSTALLATIONS

- HOTELS
- HOSPITALS
- OFFICE BUILDINGS
- RETAIL SPACE
- MILLS
- COLD STORAGE
- INDUSTRIAL SPACES
- SCHOOLS
- FACTORIES
- LAUNDRY FACILITIES
- STADIUMS AND LEISURE FACILITIES
- CATERING UNITS
- RESTAURANTS
- MILITARY BASES
- UTILITY PROVIDERS
